

# CONSTRUCTION NOTICE

## 2025 Paving Schedule - Downtown

The City of Salmon Arm will be undertaking various paving improvements downtown as part of the 2025 Paving Program, and your business may be affected as a result of the upcoming schedule. Please refer to the map on reverse side for more information of the paving locations in the area.

The paving process will require phased road closures to facilitate milling of the existing roadway surface, cleanup, and surface overlay asphalt paving. The City has contracted Okanagan Aggregates Ltd to undertake the paving works this year.

The paving work is anticipated to begin **Friday July 18<sup>th</sup>** and will include **Okanagan Avenue from Hwy1 to 4 Street; 3 Street/Alexander St from Okanagan to Hwy1; and the associated intersections.** Please anticipate a 4-5 day disruption to traffic and temporary shutdowns along the roadways being paved. Access to individual businesses may be affected during the initial road preparation process, however our Contractor will work to assist with any access needs that arise when able. Parking & property access will be restricted during paving. Please contact the City or Contractor if you have any concerns.

We appreciate your cooperation as we undertake this important work within the City.
